

# 19. Writing your own command

table of commands

01. What actually matters in this section

02. Intro to Scripting

The Basic Steps

Course section has small content. I decided to do dedicated shell scripting course.

## table of commands

commands	application

## 01. What actually matters in this section

- **important** : writing a basic script
- **nice to have** : writing the weather program

## 02. Intro to Scripting

- Bash scripting is a very powerful tool and is also a very tedious one to work with as well.

### The Basic Steps

1. Write a script in a file and save it
2. Make the script executable using chmod
3. Verify that the shell can find your script

**Course section has small content. I decided to do dedicated shell scripting course.**
